HANIS SOFEA BINTI RAHMAN

Junior Software Developer | Frontend Developer

Kulai, Johor | hanisrahman45@gmail.com | 0142-770190
GitHub: github.com/hanisrhman | Portfolio: https://hanis-portfolio.vercel.app/

PROFILE

Information Technology graduate (Bachelor of IT (Hons.), UiTM) with a three-month internship as an Assistant Software Engineer at Secure LabX Sdn. Bhd. Builds enterprise web applications with React, TypeScript and RESTful APIs (LoopBack), and has contributed across the Software Development Life Cycle (SDLC): requirement analysis, wireframing, frontend development, bug fixing, system enhancement and technical documentation. Also developed a YOLOv8 object-detection model deployed on Raspberry Pi. Works well with developers, UI/UX designers and clients, and is seeking a junior software developer or frontend role to keep growing through real-world development.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, TypeScript, Java, Python, PHP, HTML, CSS, C++
- **Frontend Development:** React, TypeScript, responsive web development
- **Backend and API:** RESTful APIs, LoopBack, API integration, Postman, Swagger
- **Database:** MySQL, Firebase
- **AI and Computer Vision:** YOLOv8, OpenCV, Roboflow, Raspberry Pi, Google Colab
- **Development Tools:** Git, GitHub, VS Code, Android Studio
- **Design and Documentation:** Figma, Canva, Docmost, Microsoft Excel, Microsoft Word, wireframing, PRD, user manuals, Gherkin scenarios, swimlane diagrams

WORK EXPERIENCE

ASSISTANT SOFTWARE ENGINEER INTERN **March 2026 – July 2026**
Secure LabX Sdn. Bhd.

- Developed and enhanced frontend modules for the CMS Secure (Central Monitoring System) platform using React and TypeScript, covering Building Device Management, Alert, CCTV Camera, Access Door and Drone modules.
- Integrated RESTful APIs (LoopBack) with frontend applications, supporting accurate data synchronisation across modules.
- Implemented new UI features, fixed bugs and optimised existing code to improve usability.
- Developed an AI-based Water Pump Failure Detection System: trained a YOLOv8 object-detection model using Roboflow, OpenCV and Google Colab, and deployed it on Raspberry Pi for real-time monitoring.
- Prepared Product Requirement Documents (PRD), user manuals, acceptance criteria, Gherkin scenarios and swimlane diagrams for the HR & Payroll, Jaga Drone and CMS GEP projects.
- Designed wireframes for the Claim Management module (HR & Payroll) and the CMS Dashboard module (CMS GEP), incorporating supervisor and stakeholder feedback before handover to the UI/UX design team.
- Collaborated with frontend and backend developers, UI/UX designers and clients throughout the SDLC.

Technologies: React, TypeScript, LoopBack, RESTful APIs, Python, YOLOv8, OpenCV, Roboflow, Google Colab, Raspberry Pi, Figma

SKIM KHIDMAT PELAJAR (SKP) **June 2023 - December 2025**
ISTIADAT KONVOKESYEN UiTM ke 96-103
Bahagian Rekod Pelajar dan Konvokesyen (BRPK), UiTM
Clerk and Management – Part Time

- Managed logistics and distribution of graduate robes, mortarboards, hoods and folders for UiTM Convocation Ceremonies 96–103.
- Managed attire inventory data in Google Sheets, recording total quantities of robes, mortarboards, hoods, folders, defective items and other related items to report the stock used in the current convocation session and prepare stock for the next session.
- Coordinated and ushered large groups of graduates, maintaining an organized flow within the convocation hall.
- Supported administrative and operational tasks across multiple convocation ceremonies.

INDUSTRY PROJECTS (Secure LabX Sdn. Bhd., 2026)

- **CMS Secure (Central Monitoring System) |** React, TypeScript, LoopBack

  Developed frontend modules and integrated REST APIs for Building Device Management, Alert Monitoring, CCTV Camera, Access Door and Drone management.

- **HR & Payroll System |** Docmost, Figma, Canva

  Prepared the PRD, user manual and requirement analysis, and designed wireframes for multiple HR modules.

- **CMS GEP (GuardExpert Pro) |** Docmost, Figma

  Gathered requirements and designed dashboard wireframes based on client feedback.

- **Jaga Drone System |** Docmost, Figma

  Documented the PRD covering authentication, mission planning, dashboard, asset management, live video and flight logs.

- **AI Water Pump Failure Detection |** Python, YOLOv8, Roboflow, OpenCV, Google Colab, Raspberry Pi

  Developed an object-detection model to identify water pump failures and deployed it on Raspberry Pi for real-time monitoring.

ACADEMIC PROJECT EXPERIENCES

- **ResQRide – Motorcycle Emergency Assistance Mobile Application (Final Year Project)**

A mobile application developed to assist motorcyclists during breakdowns or emergency situations by providing emergency alerts, nearby workshop locator services, and GPS navigation. The application aims to enhance road safety and response efficiency in urban areas.

Software/Tools: Android Studio, Firebase, Google Maps API

- **UiTM Convocation Attire Reservation System**

A web-based system developed to manage graduation robe reservations for UiTM students, helping streamline the booking process, reduce manual handling, and improve coordination between students and administrators. The system includes features such as student reservation submission, reservation status tracking, and basic administrative management.

Language: HTML, CSS, JavaScript, PHP, MySQL

- **PetResQ - PetFinder Mobile Application**

A mobile application designed to help locate and assist lost or stray pets by connecting users with nearby pet sightings and rescue-related information. The app focuses on improving animal welfare through digital solutions and community involvement.

Software: Android Studio, Google Maps API, Firebase

EDUCATIONS

Universiti Teknologi Mara (UiTM) Shah Alam **2023 - 2026**
Bachelor of Information Technology (Hons.)

- **CGPA**: 3.12. Studies completed 2026; Expected Graduation: 2027

Universiti Teknologi Mara (UiTM) Segamat **2020 - 2023**
Diploma in Mathematical Sciences

- **CGPA:** 3.69 | **Muet:** Band 3.5
- Recipient of Anugerah Naib Canselor (Vice Chancellor's Award)

Sekolah Menengah Kebangsaan Seri Pinang **2015 - 2019**
Sijil Pelajaran Malaysia (SPM)

- **SPM:** 4A 3B 2C

ACHIEVEMENTS

- Gold Medal, Kuala Lumpur International Innovation, Invention & Design Competition (KL3IS) 2024, for the Healing App project. Team leader who proposed the app's features and structured the project.
- Anugerah Naib Canselor (Vice Chancellor's Award), UiTM.
- Dean's List, UiTM Diploma, Semesters 1–5.
- Participant, Data Hackathon Tournament 2024, organised by the Unit Perancang Ekonomi Negeri Melaka (UPEN) and Institut Tun Perak.
- Head of Module Bureau, SULAM: Smart Business Siri 3. Coordinated module development by organizing, summarizing and reviewing final content for reuse in community engagement activities.

LANGUAGES

- Bahasa Melayu: Fluent
- English: Proficient (MUET Band 3.5)
