HANIS SOFEA BINTI RAHMAN

BACHELOR IN INFORMATION TECHNOLOGY

Kulai, Johor • hanisrahman45@gmail.com • 0142-770190
github.com/hanisrhman • MY-Portfolio - hanis-portfolio.vercel.app/

PROFILE

Final-year Bachelor of Information Technology (Hons.) student with hands-on experience as an **Assistant Software Engineer Intern** at Secure LabX Sdn. Bhd. Experienced in developing enterprise web applications using **React**, **TypeScript**, and **RESTful API integration** with LoopBack. Contributed across multiple stages of the Software Development Life Cycle (SDLC), including requirement engineering, UI/UX implementation, frontend development, AI model development, software documentation, and system enhancement. Passionate about building scalable software solutions and continuously improving through real-world development experience.

EDUCATIONS

Universiti Teknologi Mara UiTM Shah Alam **2023 - 2026**
Bachelor of Information Technology (Hons.)

Universiti Teknologi Mara UiTM Segamat **2020 - 2023**
Diploma in Mathematical Sciences

- **CGPA:** 3.69 | **Muet:** Band 3.5
- Recipient of Anugerah Naib Canselor (Vice Chancellor's Award)

Sekolah Menengah Kebangsaan Seri Pinang **2015 - 2019**
Sijil Pelajaran Malaysia (SPM)

- **SPM:** 4A

WORK EXPERIENCE

ASSISTANT SOFTWARE ENGINEER INTERN **March 2026 – July 2026**
Secure LabX Sdn. Bhd.

- Developed and enhanced frontend modules for the CMS Secure platform using React and TypeScript, including Building Device Management, Alert, CCTV Camera, Access Door, and Drone modules.
- Integrated RESTful APIs with frontend applications using LoopBack, ensuring accurate data synchronization and improved system functionality.
- Enhanced application usability by implementing new UI features, fixing bugs, and optimizing existing code.
- Prepared Product Requirement Documents (PRD), User Manuals, Acceptance Criteria, Gherkin Scenarios, and Swimlane Diagrams for the HR & Payroll, Jaga Drone, and CMS GEP projects.
- Designed wireframes for Claim Management and CMS Dashboard modules, incorporating supervisor and stakeholder feedback before handover to the UI/UX design team.
- Developed an AI-based Water Pump Failure Detection System using YOLOv8, Roboflow, OpenCV, and Google Colab, and deployed the trained model on Raspberry Pi for real-world monitoring.
- Collaborated with cross-functional teams, including frontend and backend developers, UI/UX designers, and clients, throughout the Software Development Life Cycle (SDLC).

SKIM KHIDMAT PELAJAR (SKP) **June 2023 - December 2025**
ISTIADAT KONVOKESYEN UiTM ke 96-103
Bahagian Rekod Pelajar dan Konvokesyen (BRPK)
Clerk and Management – Part Time & Full Time

- Managed the logistics and distribution of graduate robes and folders for convocation ceremonies, ensuring smooth operations for thousands of attendees.
- Coordinated and ushered large groups of graduates, maintaining strict organizational flow within the convocation hall.
- Assisted in the administrative management of multiple Convocation Ceremonies (UiTM 96-103).

INDUSTRY PROJECTS

- **CMS Secure (Central Monitoring System)**

Developed frontend modules and integrated REST APIs for Building Management, Alert Monitoring, CCTV Camera, Access Door, and Drone management.

Technologies: React • TypeScript • LoopBack

- **HR & Payroll System**

Prepared PRD, User Manual, Requirement Analysis, and Wireframe Design for multiple HR modules.

Technologies: Docmost • Figma • Canva

- **CMS GEP (GuardExpert Pro)**

Conducted requirement gathering and designed dashboard wireframes based on client feedback.

Technologies: Docmost • Figma • Sketching

- **Jaga Drone System**

Documented PRD for authentication, mission planning, dashboard, asset management, live video, flight logs and more.

Technologies: Docmost • Figma

- **AI Water Pump Failure Detection**

Developed object detection model using YOLOv8 and deployed on Raspberry PI for real-time monitoring

Technologies: Python • YOLOv8 • Roboflow • Google Colab • Raspberry Pi

---

ACADEMIC PROJECT EXPERIENCES

- **ResQRide – Motorcycle Emergency Assistance Mobile Application (Final Year Project)**

A mobile application developed to assist motorcyclists during breakdowns or emergency situations by providing emergency alerts, nearby workshop locator services, and GPS navigation. The application aims to enhance road safety and response efficiency in urban areas.

Software/Tools: Android Studio, Firebase, Google Maps API

- **UiTM Convocation Attire Reservation System**

A web-based system developed to manage graduation robe reservations for UiTM students, helping streamline the booking process, reduce manual handling, and improve coordination between students and administrators. The system includes features such as student reservation submission, reservation status tracking, and basic administrative management.

Language: HTML, CSS, JavaScript, PHP, MySQL

- **PetResQ - PetFinder Mobile Application**

A mobile application designed to help locate and assist lost or stray pets by connecting users with nearby pet sightings and rescue-related information. The app focuses on improving animal welfare through digital solutions and community involvement.

Software: Android Studio, Google Maps API, Firebase

ACHIEVEMENTS

- Dean's List, Universiti Teknologi MARA (UiTM) (Diploma, Semester 1–5) and recipient of Anugerah Naib Canselor (Vice Chancellor's Award).
- Gold Medal Award, Kuala Lumpur International Innovation, Invention & Design Competition (KL3IS), for an innovation-based project **"Healing App"**.
- Participated in Hackathon Tournament (Python) 2024, organized by the Faculty of Computer & Mathematical Sciences – Melaka Intelligence Centre.
- SULAM: Smart Business Siri 3
  Served as Head of Module Bureau, responsible for coordinating the overall development of the module by organizing, summarizing, and reviewing the final content to ensure it can be reused in community engagement activities.
- Recognized for strong leadership and teamwork in completing academic and group projects.

TECHNICAL SKILLS

Programming

JavaScript • TypeScript • Python • PHP • HTML/CSS • C++

Web Development

React • RESTful APIs • LoopBack

AI & Computer Vision

YOLOv8 • OpenCV • Roboflow • Raspberry Pi

Database

MySQL • Firebase

Tools

Git • GitHub • VS Code • Postman • Swagger API • Figma • Google Colab • Android Studio

SOFT SKILLS

- Problem Solving
- Analytical Thinking
- Team Collaboration
- Communication Skills
- Time Management
- Adaptability
- Requirement Analysis
- Technical Documentation
- Attention to Detail

LANGUAGES

Bahasa Melayu – Fluent

English - Proficient
